

# TRAN THUAN HOAN

Undergraduate Researcher in International Economics

Foreign Trade University | Hanoi, Vietnam

marcuz-research.vercel.app

## RESEARCH PROFILE

Undergraduate researcher in International Economics working across quantitative economics, econometrics, machine learning, innovation systems, data science, and public policy. Interested in solving complex economic problems through rigorous empirical and interdisciplinary research.

## EDUCATION

**Bachelor of International Economics - High Quality Program**

Expected 2027

Foreign Trade University

Current GPA: 3.72 / 4.00. Selected coursework: Advanced Mathematics (10.0), Probability & Statistics (9.3), Econometrics I (9.5), and Econometrics II (10.0).

## RESEARCH EXPERIENCE

**Research and Development Department**

Current

Young Researchers Club

Contributes to research development activities and an interdisciplinary student research community.

**Research Department**

Current

Global Economics Club

Supports economics research and analytical activities within the club's research department.

**Data Analysis Division - Organizing Committee**

2025

G'Contest 2025

Worked with the organizing committee on data analysis for the 2025 competition.

## SELECTED RESEARCH

**Dynamic Relationship between Energy Transition and Green Growth**

In progress

Current working paper

Studies the moderating role of public attention in the dynamic relationship between energy transition and green growth.

**Macroeconomic Crisis Early Warning System**

Completed

Machine learning research project

Developed a classification workflow using Python, XGBoost, and SHAP to combine predictive performance with explainable risk signals.

**Fuel Import Volume Analysis**

Completed

Applied economics project

Applied panel-data econometrics in Stata to analyze fuel import volumes and macroeconomic variation.

## LEADERSHIP

**Vice President**

Current

International Economics Union (IEU)

Serves in the latest leadership role within the International Economics student community.

## METHODS & TOOLS

**Methods:** econometrics, panel data, quantitative research, statistical analysis, policy analysis, machine learning, classification, and regression.

**Tools:** Python, SQL, Stata, Excel, Power BI, Scikit-learn, XGBoost, SHAP, Pandas, NumPy, and Matplotlib.

**Languages:** Vietnamese (native), English (IELTS 7.0).
